## Target Details

Alternative Name:	Lipase I ( <a href="#">LIPI Products</a> )
Background:	PRED5, LPDL, CT17, Membrane-Associated Phospholipase A1 Beta, Cancer/Testis Antigen 17, Membrane-associated phosphatidic acid-selective phospholipase A1-beta

## Application Details

Application Notes:	Western blotting: 0.5-2 µg/mL Immunohistochemistry: 5-20 µg/mL Immunocytochemistry: 5-20 µg/mL Optimal working dilutions must be determined by end user.
Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
Restrictions:	For Research Use only
